-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 2-8 and 27-29, drawn to a speaker mechanism of a mobile phone wherein the speaker is mounted at the inner surface of the upper side of a drawer cover of the mobile phone and connected with an audio amplifier through a connecting member which comprises a plunger terminal of which one end is movably adhered to the surface of a wiring circuit of the mobile phone, classified in class 455, subclass 575.4.
 - II. Claims 9-13 and 27-29, drawn to an antenna mechanism of a mobile phone wherein the antenna comprises a moving terminal formed at the lower side of a whip part of the antenna, classified in class 455, subclass 575.7.
 - III. Claims 14-26 and 27-29, drawn to an operating unit mechanism of a mobile phone wherein the operating unit comprises a driving motor for providing a driving force to move a drawer cover of the mobile phone, classified in class 379, subclass 433.12.
2. The inventions are distinct, each from the other because of the following reasons:
3. Inventions [I] and [II] are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each

other if they are shown to be separately usable. In the instant case, invention [II] has separate utility such as the antenna mechanism of a mobile phone wherein the antenna comprises a moving terminal formed at the lower side of a whip part of the antenna. See MPEP § 806.05(d).

4. Inventions [I] and [III] are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention [III] has separate utility such as the operating unit mechanism of a mobile phone wherein the operating unit comprises a driving motor for providing a driving force to move a drawer cover of the mobile phone. See MPEP § 806.05(d).
5. Because these inventions are distinct for the reasons given above and the search required for Group [I] is not required for Group [II] or Group [III], restriction for examination purposes as indicated is proper.
6. Claim 1 link(s) inventions [I] and [II] and [III]. The restriction requirement between inventions [I] and [II] and [III], the linked inventions is subject to the nonallowance of the linking claim(s), claim 1. Upon the allowance of the linking claim(s), the restriction requirement as to the linked inventions shall be withdrawn and any claim(s) depending from or otherwise including all the limitations of the allowable linking claim(s) will be entitled to examination in the instant application.

Applicant(s) are advised that if any such claim(s) depending from or including all the limitations of the allowable linking claim(s) is/are presented in a continuation or divisional application, the claims of the continuation or divisional application may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Where a restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01.

7. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
8. Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even through the requirement be traversed.
